New in JMP 18 and JMP Pro 18

Wednesday, 18 September 2024 11:30 (30 minutes)

Version 18 of JMP and JMP Pro are being released in Spring 2024, bringing a host of new features useful to scientists and engineers in industry and academia. This presentation will focus on some key extensions and improvements: Besides an improved user experience based on a new Columns Manager for easier data management or Platform Presets for creating and reusing customized report templates, we will present a completely overhauled Python integration, a Deep Learning extension via the Torch library and other improvements.
