Problem solving session: analysis of batch process data from multiple sources for process improvement and for reduction in testing costs

Monday, 17 May 2021 13:00 (1 hour)

This project was initiated by engineers and scientists who have been exploring the exciting combination of new online data and new methods of data analysis. We will share our characterization of the data they collected and the questions they are asking. After giving a very brief description of the methods tried so far and issues that have arisen, we anticipate hearing your suggestions for tackling these problems.

For more details view the attached material.

Primary authors: ASSCHER, Jacqueline (Kinneret College and Technion); MENDEL, Yossi (Teva Pharmaceutical Industries)

Presenter: ASSCHER, Jacqueline (Kinneret College and Technion)

Session Classification: Data explorations workshop

Track Classification: Data Science in Process Industries
